EXERCISE 1

Solutions

1. SELECT Statement
SQL query to retrieve all columns from the employee's table.
SELECT * FROM employees;

2. SELECT DISTINCT statement.
SQL query to find all the unique departments in the employee's table.
SELECT DISTINCT department FROM employees;

3. ORDER BY statement
SQL query to retrieve all employee's first & last names, ordered by salary in descending order.
SELECT first_name, last_name
FROM employees
ORDER BY salary DESC;

4. LIMIT statement
SQL query to retrieve the top 5 highest paid employees.
SELECT * FROM employees
ORDER BY salary DESC
LIMIT 5;

5. WHERE statement
SQL query to find employees who work in the IT department
SELECT * FROM employees
WHERE department = 'IT';

6. AND Statement

SQL query to find employees who work in the Finance department AND have a salary greater than 58,000.

```
SELECT * FROM employees
WHERE department = 'Finance' AND salary > 58000;
```

7. OR Statement

SQL query to find employees who work in the HR department OR the Marketing department.

```
SELECT * FROM
WHERE department = 'HR' OR department = 'Marketing';
```

8. NOT Statement

SQL query to find employees who do not work in the IT department.

```
SELECT * FROM employees
WHERE NOT department = 'IT';
```

9. IN statement

SQL query to find employees who are in the HR, IT OR Finance departments.

```
SELECT * FROM employees
WHERE department IN ('HR', 'IT', 'Finance');
```

10. Combining Conditions

SQL query to find employees who are in the IT department, have a salary greater than 50,000 and are located in New York.

```
SELECT * FROM employees
WHERE department = 'IT' AND salary > 50000 AND city = 'New York';
```

11. Combining WHERE, AND, and ORDER BY

SQL query to retrieve the first and last names of employees who work

in the finance or marketing department, earn more than 52000 and order the results by salary in descending order.

```
SELECT first_name, last_name FROM employees
WHERE department IN('Finance','Marketing') AND salary >52000
ORDER BY salary DESC;
```

12. Combining SELECT DISTINCT, WHERE and IN

Write SQL query to find all the unique cities where employees work, excluding those in the IT and HR departments.

```
SELECT DISTINCT city FROM employees
WHERE department NOT IN('IT','HR');
```

13. Combining WHERE, NOT, AND, and ORDER BY

SQL query to retrieve employees who are NOT in the finance department, have a salary greater than 50,000 and order the results by hire date in ascending order

```
SELECT * FROM employees
WHERE NOT department = 'Finance' AND salary >50000
ORDER BY hire_date ASC;
```

14. Combining WHERE, OR, IN and LIMIT

SQL query to find the first 3 employees who work in either Chicago or Los Angeles and belong to the IT or Marketing department.

```
SELECT * FROM employees
WHERE city IN('Chicago','Los Angeles') AND department IN('IT','Marketing')
LIMIT 3;
```
